

Action plan based on the student feedback received in the 2nd semester of the 2020/2021 academic year

Department: Genetics Cell- and Immunobiology

Faculty: EM_ AOKGEN738_1A

Our feedback on general comments by the students:

The questionnaire was submitted by 71 of 237 students, only two written comments were received. In general, the students were satisfied with the organization and usefulness of the lectures and the practices.

Proposal: We are planning to better involve students in lectures, and make them more interactive by inserting short videos, question pools, and games to improve activity.

In addition to the classical examples of human genetics, we also plan to present more medical-specific examples.

We organize a competition, encouraging students to take on complex problem-solving tasks.

Strengthen: Based on DK 3, the students successfully used the Moodle interface for learning.

The general evaluation (K13) corresponds to the Faculty average.

Our feedback on specific comments on mandatory subjects:

1: *"the midterm online had trouble loading fast, and sometimes the moodle was freezing"*

Proposal: *We are developing our IT capacity.*

2: *„the lecture via zoom and the recordings of the lectures were great! this helps the lot to study properly and review the lectures! The consultation also was great via zoom..."*

Proposal: *We plan to incorporate and develop the experience of online education*

Date: 02. 10. 2021
