

# **Action plan based on the student feedback received in the 1st semester of the 2021/2022 academic year**

**Department: Genetics , Cell- and Immunobiology**  
**Faculty: EM Immunology**

## **Our feedback on general comments by the students:**

The evaluation of the subject Immunology is considered incorrect.

In the first semester of 2021/22, our Institute announced a CV and FM course for medical students who failed the course at the end of the previous semester or year.

In the CV and FM courses, we do not have lectures in the given semester.

A total of 65 students registered for the CV and FM courses in Immunology AOKGEN737\_1A, according to the questionnaire received from the Dean's Office, seven of them completed the questionnaire.

Given that there is no lecture or internship in either the CV or FM course, the assessment given by the seven students is completely meaningless and incomprehensible (See the following questions of the questionnaire: "Q01 To what extent did the teaching work of the institute arouse interest in the subject? K02 To what extent was the teaching of the subject organized? ? K05How much did the lectures contribute to the acquisition of the curriculum? K06How well were the exercises organized and well structured?").

In view of all this, we respectfully request the Dean to remove the OMHV evaluation of Immunology from the list, and please also indicate this to the subject evaluations committee.

Date: 2022. 04. 20.
