

Action plan based on the student feedback received in the 1st semester of the 2022/2023 academic year

Department: Genetics, Cell- and Immunobiology

Faculty: Eph Basic Immunology GYKGEN070E1A

Our feedback on general comments by the students: The feedback results for Basic Immunology subject are significantly lower than the faculty average.

The highest discordance were in **K03**.

Number of students, who filled the OMHV evaluations prior to registration for the exams is 22 out of 36 registered students. Number of students attending the lectures were the next:

2022.09.08: 3 persons - scoring by 5,00

2022.09.29: 5 person - scoring by 4,80

2022.10.06: 3 persons - scoring by 4,67

2022. 10.20: 2 persons – scoring by 5,00

2022.10.28: 2 persons - scoring by 5.00

On the other lectures only one student took place, scoring them by 5,00.

Taken together, as more than 90% of students haven't attended the lectures, the result of the survey hardly reflects the real situation.

Actually the **average of on the spot (realtime after the lecture) evaluations of the lectures (K04, K05), were 4.89 (see above) compared to the result (4,05 and 4,00) of the general OMHV survey.**

In the next we would like to increase the interest of students for the subject by holding mini-tests at the end of the lectures for bonus points. Students achieving an appropriate threshold by collecting bonus points, are offered to take a simplified exam.

As Eph Student do not have practice in Immunology, **the answers for Q06, Q07 are not relevant.**

We follow the instructions of the Rector and the Dean and we hold the lectures with personal attendance. However we are going to continue the recordings and uploading the voice completed version of the live lectures in the future, as we have experienced this helps a lot to study properly.

We provided 180 very basic pop-in questions with correct answers to help study the principles of immunology. At the exam 15 of 60 points included these pre-provided tests and 30 out of 60 points had to be obtained for a successful exam.

Our feedback on specific comments on mandatory subjects:

Our feedback on specific comments on elective subjects:

Date:2023. 04. 20.
