

Action plan based on the student feedback received in the 2nd semester of the 2022/2023 academic year

Department: Genetics, Cell- and Immunobiology

Faculty: EM Immunology AOKGEN737_1A

Our feedback on general comments by the students: The feedback results for Immunology subject are equal, or in case of seven questions slightly higher than the faculty average. The results verify that the way how we teach immunology is accepted by the students.

Our feedback on general comments about the practices by the students: The feedback results for Immunology practices are equal, or in case of seven questions slightly higher than the faculty average.

The results verify that the way how we teach immunology is accepted by the students. From the comments of students we got the feedback, that the teachers, including PhD students as well, are committed, well-prepared and student-friendly educators. The senior teachers will continue to mentor new teachers starting education and provide professional and pedagogical training for them.

Our feedback on specific comments on mandatory subjects:

Students have highlighted the significance of the voice completed versions of the lectures. We are going to hold it on and record the lectures in the future as well. Some students found the practices interactive enough, others not. The differences are due to the different personality of the lecturers. It should be noted that all teachers hold the practices by the same high professionalism.

Date: 2023. 09. 22.
